**COMPOST BIN** White. Made of steel with plastic inner bucket.  
7.7" diameter x 8"H #17007 \$28

### COMPOSTING TIPS

By composting food scraps rather than throwing them in the trash, you reduce methane emissions.

Compost is an ideal replacement for chemical fertilizers, and you can use it anywhere you use fertilizer.

A good general rule of thumb: If it comes from the ground, it's probably compostable. That includes veggie and fruit scraps, grains, coffee grounds, herbs, spices, nuts, egg shells, leaves, and plant trimmings.
