**ENVIRIDIS  
TECHNOLOGY  
CO. LTD.**

# SMART FISH

Our Smart Fish prototype combines autonomous sampling using remote sensing and GPS technology, real-time detection of ocean microplastics with treatment unit to mitigate . . . . .  
microplastics problem in . . . . .  
the ocean. . . . .

# GREEN WALL

Our vertical green wall design promotes green sustainability, carbon zero, wastewater and waste recycling, and enhance local biodiversity.

# OCEAN FARMING

Our solution involves an automated system with desalination technology, nutrients released from marine organisms, sensors monitoring water quality and renewable energy supporting the whole system and maintaining plant growth.
