THE BENEFITS OF HOT-DIP GALVANISATION

Being a well-established process that's helped combat steel corrosion for over a century, the benefits of galvanisation have been proven extensively. The main benefits are as follows:

LOW LONG-TERM COST

LESS MAINTENANCE

GREATER LONGEVITY

KS-F-019

阳台护栏 BALCONY RAILING

The balcony railing design fulfills an important safety function: it protects you against falling or falling from height. Not only children have to be protected on the balcony, because a careless step can also be a danger for every other person.

泳池护栏 POOL FENCE

A swimming pool fence is a type of fence placed around swimming pools, to create a passive barrier to restrict the access of small children to the swimming pool. Swimming pool fences must have a self-closing and self-latching gate/s to be compliant to most countries' laws and codes.

百叶护栏 LOUVER FENCE

Louvre fence panels have a design based on Louvre blinds, with wide, angled slats that offer a unique and stylish appearance. The gaps between pales still allows light and air to pass through, casting pleasant sunlight patterns across the garden.

KS-G-004

滑动门 SLIDING GATE

A sliding gate can combine a high level of security with ease of access where there's limited space. This makes it an appropriate choice for premises that open onto busy streets. Where there's heavy footfall or a lot of traffic, they are the best option since they open easily without drivers or pedestrians having to walk far to open and close them.

平开门 SWING GATE

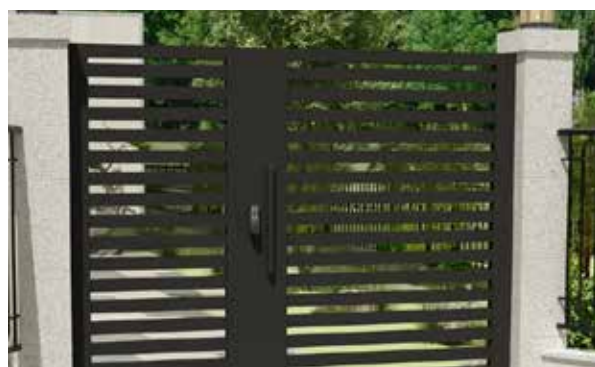

The main feature of the swing gate is the presence of two large doors, which move by rotating on a pin, leaving an open passage equal to the length of the gate for passing cars.

折叠门 FOLDING GATE

Bi-fold gates are a great way of having a gate that is situated where space is an issue or if a large slope is involved.

Bi Folding gates are normally made in 3 or 4 sections but we can also offer more sections if needed.
