

## What will your child remember from this summer?

Research shows that students can lose up to 40% of their learning momentum over the summer months.

It takes up to two months for students to get back into the learning process once they begin school in the Fall. This can cause gaps.

There is no knowing how much the effect pandemic has had on student's learning overall.

Summer is the perfect time to catch up in the trouble areas, to get ahead, or to make the necessary connections.

## Programming with The Progressive Centre

The Progressive Centre is a tutoring agency that provides quality tutors for students up to grade 12 in all subject areas.

While the pandemic has causes us to alter our in-home tutoring model, our quality of providing educational services has not changed. All of our tutors are equipped at providing sessions remotely whether via Zoom or Google Meet. The learning has not stopped while we are working from home.

This summer we are offering a wide range of programs that will cater to the unique learning needs of your child.

## WHAT ARE THE BENEFITS OF GROUP TUTORING?

There are many known benefits to one-on-one private tutoring — active participation by the student, personalized lesson plans, and focused attention on the sole student. These are great qualities, but there are some things that one-on-one tutoring just can't facilitate.

After a long year of isolation during the pandemic, many parents are worried about their child's academic progress. It's no surprise that so many parents are looking for a summer tutor to help get their child caught up after a year of so much uncertainty and transition between in-person learning and online-learning. Group tutoring is a great option because it shows students that they aren't alone in their education journey.
