FCIHR Video History of Medicine in Canada

This program constitutes in-depth biographical documentaries of major figures in Canadian health sciences. These recordings are of great value, as they provide students, historians and journalists opportunities to interrogate the personal histories and specific contributions of Canada's greats.

Over the past year, we have added Dr. James Till to the list and he is most entertaining. Distinguished Professor of History, Michael Bliss, U of T, brings out fascinating details about Dr. Till's life beyond the stem cell science he founded, along with Dr. Ernest McCulloch. Video clips of these documentaries are available at: www.youtube.com/friendsofcihr
