Cybersecurity

Securing a Larger Attack Surface

- Evolving Threat Landscape
- Remote Work Security
- Legacy Systems
- Insider Threats
- End-User Education & Awareness

Vulnerability Assessment
Penetration Testing
Vulnerability Reporting
Enumerate & Prioritize Risks

Threat Remediation
Remedy Identified Risks
Policy & Procedures
Patching, configurations
Implement security controls

Awareness Management
Enable security culture
Establish Communcation Channels
Organizational Awareness Training
Tracking & Reporting

Policy & Framework Development
Define Goals and Objectives
Aligned with Business
Establish Governance Structure
Incident Response Planning
Selecting suitable framework
- NIST
-ISO/IEC27001
-HIPPA, FFIEC, Etc.

Cyber Agility
Security Operations Centre
Continuous Threat Monting
Incident Response
Event Managemet
Remediation

Governance
Policy & Procedure Compliance
Audits
On-going Threat Monitoring & Improvement
Reporting
- Legal, Regulatory
- Organizational
