## WE MAKE COOL THINGS.

### ABOUT US

We design cool products that insulate your favorite things and elevate your every day. Things made to go with you wherever you go and look good doing it. Whether you're commuting, caravanning, cycling, catching a plane or catching some rays, Corkcicle wants to be there to keep you cool every step of the way.

### GIVING BACK

In 2018, we joined forces with charity: water to support their vision of bringing clean water to developing communities around the world. Since then, 5% of all Corkcicle.com sales have helped to provide clean water to people in need. The water projects that Corkcicle has helped to fund will provide an estimated 2.8 million gallons of water per year and we look forward to increasing our giving in 2020 and beyond.

### SUSTAINABILITY

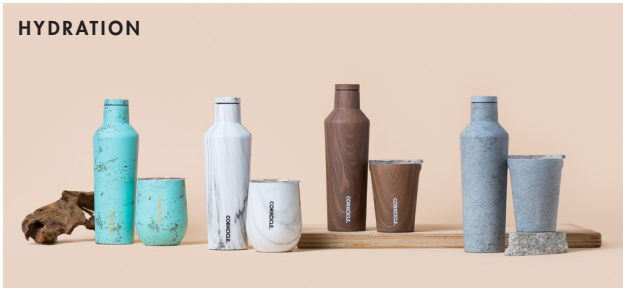

We stand for sustainability. Our products are made to be used over and over, helping to keep plastic bottles out of landfills and our oceans. We pledged to eliminate single use plastic from all of our packaging by the end of 2020 and we're on track to make our goal a reality.
