

Petition in Support of “Labor Against Conquest”

Whereas, workers everywhere share a common interest in peace and stability, and conflict threatens livelihoods, human rights, and the ability of labor communities to organize freely;

Whereas, the United Nations Charter and General Assembly Resolution 3314 (1974) define aggression to include “the use of armed force by a State against the sovereignty, territorial integrity, or political independence of another State”;

Whereas, any annexation or invasion by the United States of a sovereign nation, particularly Canada or Mexico, or any other act that meets the UN definition of aggression, would disproportionately harm working families and undermine the principles of international solidarity;

Whereas, it is our moral and civic duty as workers to stand against all forms of unwarranted aggression and to deploy our collective power in defense of peace and human rights;

We, the undersigned, support and endorse the adoption of a resolution that:

- **Condemns Aggression**
Declares the use of military force for the purpose of annexation or invasion to be an intolerable and unjust act that violates international law and the fundamental principles of peace.
- **Establishes a Strike Trigger**
Commits our union, labor organization, or labor community to a democratic vote to enact a strike (or work stoppage) in the event that the United States government undertakes any act constituting aggression under UN definitions.
- **Demands Accountability and Transparency**
Calls upon our elected representatives and government officials to adhere strictly to international norms, respect the sovereignty of other nations, and engage only in diplomatic or lawful actions.
- **Fosters Solidarity Across Borders**
Encourages partnerships and solidarity with workers in other countries—especially those directly threatened—to oppose aggression and to advocate for peaceful conflict resolution.
- **Protects the Rights of Workers**
Ensures that workers who engage in collective action are supported by strike funds, legal resources, and a network of community allies.
