## Results report / Certificate

Dear XXXXX XXXXXX

Your coronavirus (COVID-19) test result is **negative**. You do not have the virus.

You can return to work if you've not had a high temperature for 48 hours and feel well. Talk to your employer first. If you feel well but someone you live with tests positive, self-isolate for 14 days from when that person's symptoms started. If you get symptoms of coronavirus, self-isolate for 7 days.

Contact 111 if you need medical help. For a medical emergency, dial 999.

URN	LIS ID	Test Name	Result	CT Value	Test Method
R100000207	0	COVID-19 T1	Negative	N/A	RT-PCR
R100000207	0	COVID-19 T2	Negative	N/A	RT-PCR

**Type of Test:** Sample collection for the Radox PCR test is in the form of a swab, which will gather an individual's nasopharyngeal (nose and throat) secretions.

**Technical Note:** A sample is prepared by extracting the chosen section of the genome, and then PCR (Polymerase Chain Reaction) techniques are used to amplify (replicate) the genome section, ready for detection. This type of test detects the RNA (Ribonucleic acid) contained within the SARS-CoV-2 virus.
