Academy of Injectable Arts — Botox 101
Foundations of Neuromodulator Injection: Upper Face
Saturday, November 7 · approx. 8:00 AM – 5:00 PM
2990 W Horizon Ridge Pkwy 100 - Suite D

What this course is about

Stop memorizing injection points. Learn to assess the face, understand the muscles, and build an intentional treatment plan. This course focuses on the upper face: forehead lines, frown lines (glabella) and crow's feet.

Two tracks, one classroom

Everyone attends the same classroom sessions. The difference is the hands-on portion:

- ***Clinical Track** — for licensed RNs, NPs, PAs, physicians and dentists. Includes supervised injection of live models.*
- ***Foundations Track** — for medical assistants, students and others without an eligible license. Includes injection-technique practice on training heads only; no live injection.*

The day at a glance

Morning — Foundations (all participants)

- *Welcome and pre-course check-in*
- *How neuromodulators work: mechanism, onset, duration, storage and handling*
- *Facial anatomy of the upper face: muscles, movement, and the areas to respect*

Late morning — Assessment and Planning (all participants)

- *The consultation: patient goals, medical history, contraindications, consent and photos*
- *Facial assessment at rest and in motion*
- *Treatment planning: when to inject, when to adjust, and when not to treat*

Lunch (provided)

Afternoon — Hands-On

- *Injection technique: preparation, aseptic technique, depth and angle (all participants)*
- *Live instructor demonstration, from consultation to treatment (all participants)*
- *Clinical Track: supervised injection of live models with real-time feedback*
- *Foundations Track: guided technique practice on training heads with real-time feedback*

End of day — Safety and Wrap-Up (all participants)

- *Complications: prevention, recognition, and when to refer*
- *Case review, Q&A and next steps*

What you'll leave with

- *A structured way to assess and plan upper-face treatments*
- *Hands-on practice for your track*
- *A course workbook to keep using in practice*
- *Clinical Track: Certificate of Completion*
- *Foundations Track: Certificate of Attendance*

What to bring

- *Government-issued photo ID*
- *Clinical Track: active license (verified before the course)*
- *Comfortable clothing and closed-toe shoes*
- *Clinical Track: model details will be sent separately*

This course is not accredited and does not provide CE/CME credit. A certificate does not authorize anyone to perform injections; participants practice only within the scope of their own license.

Agenda is subject to minor changes.
