A Journey To
Enlightenment

Enlightenment

“The beauty and the power of this QHHT experience is that it is literally YOU telling YOU what the root causes of your issues and challenges are and how the healing will occur. I am simply the facilitator of the process and your personal assistant on your journey to enlightenment. “

Namaste, Vicki

What is QHHT

The Quantum Healing Hypnosis Technique was developed by the late Dolores Cannon in the 1960's. She was a pioneer in Past Life Regression, and I am honored to be a Certified Practitioner of her QHHT method of hypnosis. This method uses visualization to allow clients to enter the Theta state which is the state of consciousness immediately before you fall asleep at night and right before you wake up in the morning, so QHHT is as safe as taking a nap. Here we can tap into your Subconscious Mind or Higher Self and explore past life experiences, where powerful understanding and transformative healing can take place. What you discover will allow a sense of peace and understanding to enter your soul about how past life experiences have contributed to who you are today.
