There is so much to learn in a census. The name of a person should not be the only thing you look at when you look at a census. In this class we will learn a lot of the hidden gems that can help us in finding our families.

Problem:

William E Williams is lost and looking for a way out of the census. The only way for him to do this is to connect to all of his relatives. He is looking backwards and forward for the clues to escape.

He has many unusual clues to help him along the way. Can you help him find his family? Take the censuses listed below and attach the correct census to the correct clue. More clues in the class.
