

DESIGNED BY CLAUDIO BELLINI

Claudio Francesco Bellini (1963) is living and working in Milan, where he graduated in Architecture and Industrial design at the renowned Politecnico university in 1990.

His strong fascination with creativity, is rooted in his early childhood years, inspired by his father Mario Bellini, whom counts as one of the most affluent figures in design history.

Today Claudio Bellini Design, recognized as one of the most influential European studios, is active within several fields of design, ranging from furniture to product and architecture, collaborating with leading companies worldwide including Walter Knoll; Steelcase; Poltrona Frau; Riva 1920. Many of its creations have received international design awards, among which the prestigious Red Dot, IF and Good design award.

The idea behind the design concept is to enhance the exposure of a working environment, hence providing collaborations and engagement within office spaces, while providing ample functional work spaces.

OPUS is designed to create a smart, flexible, fun, and organic

furniture collection that is suitable for every kind of working environment be it collaborative spaces, private offices, or open space.

OPUS is derived from the latin word 'Work'. Working environments are fluid and ever-changing. OPUS scalability and functionality is just the perfect solution to expand and contract as your work environment changes. What better way to build relationships, teamwork environments within your workspace community.

OPUS is a high-quality organically designed office system that can meet the needs of various functions in the office space.

The leg design is inspired by the streamlined spindle 'A-shape' pylon structure. The structure is created by precision cutting techniques and materials application which is not only three-dimensional and flexible, but also adds architectural aesthetics to the office space.

The MFC texture of OPUS is co-developed with the German MFC expert SURTECO. The patterns are clear and natural which makes finished look more vivid and uniquely attractive.

OPUS is not only aesthetically pleasing, but it's also environmentally friendly to meet the Japanese and European 'E0' stringent environmental standards.

Workstations Uniquely Connected

OPEN MIND | OPEN SPACE

The Importance of Collaboration Has Always Been at the Core of the Workspace Design Concept; and the Foundation of a Team Culture.

The Flexibility and Scalability of OPUS Prompts Us To Harness This Vibrant and Enthusiastic Working Atmosphere.

Curved Desktops and Panels Not Only Increase the Softness and Flexibility of the Space, but Also Promotes Teams Communications, Collaboration To Achieve Innovation.

In Synergy With its Stylish Leg Designs, Creating That Open Mind / Open Space Atmosphere, OPUS Is Your Perfect Value Added System Solution To Meet Your Business Goals and Objectives.

AESTHETICS = IMPACT

The Unique Color Palettes Breaks Through the Tradition.

Through the Splicing of Materials and Colors, It Gives the Space a Higher Sense of Quality and Richness.

The Connecting Beam Color Is Sprayed With Three Color Options of Ash Grey, Steel Grey and Nebulas Blue.

Executive Private & Focused

Conference Communicate & Collaborate

Meeting & Conference
