

HIKVISION[®]

ARMED TO PREVENT CRIME
HIKVISION PIR-SERIES CAMERAS

WHAT IS PIR AND HOW DOES IT WORK?

The Passive Infrared (PIR) sensor in a video surveillance camera detects intruders by distinguishing IR radiation differences between human bodies and other objects.

The passive sensor picks up the Infrared heat and turns it into an electrical signal. When the signal strength exceeds a specified level, the camera triggers the flashing light.

EFFECTIVE, HIGH DEFINITION, SMART ANALOG CAMERAS

Conventional surveillance cameras are designed to capture video for search and playback. In contrast, Hikvision's PIR-equipped cameras detect intrusions based on invisible heat-data emitted from living beings. With these cameras installed, break-in crimes can go from merely traceable – by video playback – to actively preventable – via triggered alarms.

Hikvision equips its advanced PIR cameras with 2 MP high-definition lenses and built-in PIR detectors that respond to the heat emitted by living bodies.

The "Visual Alarm" feature significantly improves the quality of captured images and video evidence for follow-up investigation.

KEY FEATURES

PIR-BASED MOTION DETECTION.

Hikvision's 2 MP HD cameras are equipped with PIR sensors which detect IR radiation up to 11 meters away.

FLASHING LIGHT WARNING.*

When PIR radiation is detected, the camera's flashing light is automatically triggered to deter would-be intruders and prevent crimes.

(* Select models only)

COLORFUL HD IMAGES AND VIDEOS.

In addition to the ultra low-light technology, the bright white flashes serve as supplemental lighting in dark environments to sharpen imaging in recorded video.

SMART FUNCTIONALITIES.

When these PIR cameras are connected with Hikvision's K-Series DVRs, the recorder's event filtering feature reduces false alarms. You can also arm and disarm the system according to specified periods of time.

1 Break-in occurs

2 IR heat is detected

3 Event identified

KEY BENEFITS

Detection and Response

Detect intruders with Passive Infrared sensing and ward them off with automatically-triggered flashing white light.

Clear Evidence

Capture clear video evidence of suspects with bright light when triggered.

Accurate Alarms

The K-Series DVR's Motion Detection will radically reduce both false alarms and video-data storage requirements.

PRODUCT SHOWCASE

DS-2CE11D8T-PIRL

- PIR detection, 11-meter detection range
- Ultra low light technology (up to 0.005 lux)
- Flashing white light

DS-2CE12D8T-PIRL

- PIR detection, 11-meter detection range
- Ultra low light technology (up to 0.005 lux)
- Flashing white light
- 24-hour CHROMATIC vision with supplemental lighting

DS-2CE71D8T-PIRL

- PIR detection, 11-meter detection range
- Ultra low light technology (up to 0.005 lux)
- Flashing white light

DS-2CE38D8T-PIRL

- PIR detection, 11-meter detection range
- Ultra low light technology (up to 0.005 lux)
- Audio interface
