THE FASTEST imagePROGRAF EVER

Designed for optimal production, efficiency, and versatility, the imagePROGRAF TZ large-format printer is a cutting-edge hybrid solution. It stands out in the production aqueous inkjet market with its capability to print a wide range of output from monochrome line drawings to vibrant full-color posters on various media substrates.

Key Features:

- **LUCIA TD 5-Color Pigment Ink System**—the Magenta ink and improved line clarity help produce detailed lines and sharp text for CAD designs, signage, and more.
- **Intelligent Media Handling** offers automatic media switching capabilities, feeding and type/length/width detection for enhanced operation that is approximately 34 percent faster than previous generations.
- **Integrated Top Output Stacker** for easy handling of up to 100 ARCH E prints from the front of the printer.
- **Twin Carriage Motors and parallel processing** included for maximum productivity.

LUCIA TD 5-Color Pigment Ink System

Now featuring newly developed magenta ink, the imagePROGRAF TZ Series is designed to deliver outstanding red color reproduction. With the ability to create eye-catching posters, as well as fine-detailed CAD documentation, these devices are suitable for a wide range of applications. The use of pigment ink for all colors helps to ensure prints are resistant to fading, making them ideal for poster output, but also provides water resistance for outdoor prints such as technical documents and line drawings.

Improved Line Clarity

New image processing improvements and LUCIA TD ink help to enhance CAD drawings, blueprints, AEC documentation, and poster reproductions with a large color gamut and improved text and line quality. This makes output more crisp, defined, and clear.

Color Calibration

Now available in the imagePROGRAF TZ Series, the ability to calibrate your printer helps ensure your output is color consistent over time and across multiple TZ-32000 devices.

Speed*

At up to 4 D-size prints a minute, this is the fastest imagePROGRAF ever! In addition, the imagePROGRAF TZ Series has faster media loading from the previous model by approximately 34 percent.

Ease of Use

The imagePROGRAF TZ Series has been built with production and efficiency in mind with an easy-to-use dual-roll design, front top output stacker—fitting up to 100 ARCH E sheets—and 4.3" user interface screen. The user interface screen displays the ink and sub-ink tank levels, media indicator levels, and other setting prompts all on the home screen!

Intelligent Media Handling

Simply place a roll of media on the opened drawer and slide the media into the printer with ease! Once the media is loaded into the imagePROGRAF TZ Series, the printer will automatically find the leading edge and feed the media. From there, the imagePROGRAF TZ Series will automatically determine the media type, length, and width, which will be shown on the display panel.

Z36 Scanner

The 36" lightweight Z36 scanner sits on top of the device acting as a single-footprint which helps make your workflow easy and seamless.

- Scan monochrome documents at up to 13" per second and color documents at up to 6" per second
- 15.6" Controller
- Scan up to 1200 dpi

Security Features

The imagePROGRAF TZ Series has a bevy of security features to help provide peace of mind when it comes to the privacy of your documentation.

- PIN Printing
- Self-encrypting hard drive with AES 256 technology
- IPsec, 802.1x compatible; TLS enabled
- Capabilities to disable USB port, Ethernet Port, and USB Direct Thumb Drive

Environmentally Conscious

Currently registered as EPEAT® Gold—a first in the imagePROGRAF TZ Series—and as ENERGY STAR® certified, these large format printers are replacing EPS packaging materials with cardboard packaging and reducing power consumption.

¹14 seconds for an ANSI D print and 4 ANSI D prints/minute speed measured after first print in Fast Q5 mode, using plain paper. Print speed is based on internal testing. Print speed may vary depending on the number of copies selected, as well as on the settings for size, type, and orientation of paper.
²All speeds measured using plain paper, Fast Q5 mode. The 243 ANSI D prints/hour is measured from when the first print begins printing. Print speed is based on internal testing. Print speed may vary depending on the number of copies selected, as well as on the settings for size, type, and orientation of paper.

³Line accuracy repeatability is guaranteed after a user performs necessary adjustment and under the same environmental conditions. Applies to media for line drawing (Plain Paper, Coated Paper, CAD Translucent Matte Film, and CAD Tracing Paper) only.
⁴Theoretical value based on data resolution.
⁵The maximum printable length varies depending on the application, OS, and RIP used.
⁶Wireless printing requires a working network with wireless 802.11b/g or 802.11n capability. Wireless performance may vary based on terrain and distance between the printer and wireless network clients.
⁷The scan rate is proportional across the full range of resolutions supported by the scanner. Actual scan times will depend on the host system performance. Quoted top speeds may be limited by the effective bandwidth of the USB 2 and is not guaranteed for all media types.
⁸The quoted scan accuracy may vary depending on the operating environment and the thickness of the media.
