RE: Universal Language Room Project

Dear Jason:

I am very excited about this project of yours. Having known you for a few years, I have complete confidence in your ability to bring this project to fruition. The Universal Language Room has a tremendous vision which is to offer any person immediate access to the direct experience and beauty of improvisational music. Improvisation, on any level is something very special and has the power to change lives and behavior, especially when it involves groups of people. I wish you and your team a lot of success.

Yours truly
