ILLUMINATED MAGNIFIERS

43744

43644

"CLEARVIEW"

- Available with either a 3-diopter or 5 diopter, 7½" x 6¼" bio-convex lens with two compact 9 watt fluorescent tubes.
- Increases field of vision and allows 3 dimensional viewing.
- Concealed spring balancing system and swivel neck provides ease of positioning.

"SUPER MAG"

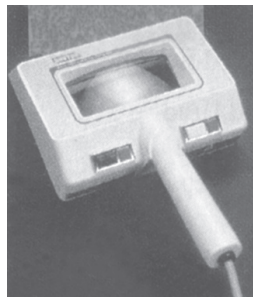

- A 7" diameter, 5 diopter (+125% magnification- 8" focal length) lens coupled with a 26 watt FM6 high lumen, full spectrum fluorescent tube provides undistorted magnification, extra wide viewing area and more lumens per watt than conventional fluorescent tubes.
- Swivel neck rotates axially and provides angular adjustment.
- Concealed spring balancing system enables the lamp to be turned, raised, lowered, or tilted to any desired position.

• White No. 169 - Replacement 26 watt high lumen, full spectrum fluorescent tube.
