

My inspirations come from nature, the human form, science and mathematics and they depict my visions of emotions and experiences. I primarily paint in acrylics but also work in sculpting, furniture and photography. I am involved with my music and videos. My experience has been in film, theatre and commercials. Through working in multi medias I have discovered and experimented with a plethora of materials and techniques. I continue to explore and enjoy the varied experiences of all the realms and facets of art.

Mark Krawczynski
