4. FIRST AID MEASURES**INHALATION:**

Allow the victim to rest in a well-ventilated area. Seek immediate medical attention if symptoms persist. This is an unlikely route of exposure based on low amount of volatile components unless product is used in a manner to produce a mist.

EYE CONTACT:

Material contains surfactant and is alkaline. Alkaline materials can be damaging to the eye if not washed out immediately. Flush eyes with plenty of water for at least 15 minutes occasionally lifting the upper and lower eyelids. Check for and remove contact lenses. Seek medical attention if irritation persists.

SKIN CONTACT:

Material contains some surfactant and is alkaline. Frequent direct contact with material can result in drying of the skin. Normal use of skin care products should alleviate the dryness. If skin does not improve after application of skin care products, seek medical attention.

INGESTION:

Material has an alkaline pH. May cause some indigestion but no long term effects are expected.

5. FIRE FIGHTING MEASURES

Flashpoint and Method: >200 F

Flammable Limits: Not Applicable

Autoignition Temperature: Not Applicable

GENERAL HAZARD:

Product is water-based and not likely to support combustion.

FIRE FIGHTING INSTRUCTIONS:

Product is water-based and is not likely to support combustion. If involved in a fire, not likely to support combustion. As with any fire, wear full protective clothing and NIOSH-approved self-contained breathing apparatus with full facepiece operated in the pressure demand or other positive pressure mode.

6. ACCIDENTAL RELEASE MEASURES**LAND SPILL RESPONSE:**

Product is miscible with water and small spills will soak into the land before attempts are made to collect the spill. If spill occurs on impermeable surface, the spill can be absorbed with an absorbent media. Unless mixed with something meeting the regulatory definition of a hazardous waste, the spilled material can be disposed of as regular waste material.

WATER SPILL:

Product is water based and spilled material will mix with water immediately. Product contains small amounts of surfactants known to be toxic to aquatic organisms. Avoid using the product in a location where there is a possibility of introducing it into a water body.

RECOMMENDED DISPOSAL:

This product is defined as a RCRA hazardous waste based on pH. Neutralization and sewerage may be a disposal option depending on the quantity to be disposed of and municipal wastewater disposal regulations.

7. HANDLING AND STORAGE

STORAGE TEMPERATURE: Ambient

STORAGE PRESSURE: Atmospheric

GENERAL:

- (1) Keep container closed when not in use.
- (2) Follow all SDS/label warnings. Empty container is not expected to present a hazard.
