

NutriBoost High Iron

GUARANTEED ANALYSIS

Zinc (Zn)	1.00%
Manganese (Mn)	1.00%
Iron (Fe)	2.00%
Copper (Cu)	0.05%
Boron (B)	0.02%

Derived from Zinc Sulfate, Manganese Sulfate, Copper Sulfate, Iron Sulfate, Boric Acid, Ammonium Hydroxide, and Ethylenediaminetetraacetic acid.

Net Weight: 9.8 lb/gallon (1.1479 kg/litre)
(pH 5.5 and Specific Gravity 1.174)

KEEP OUT OF REACH OF CHILDREN

CAUTION: HARMFUL IF SWALLOWED. Avoid contact with skin, eyes, and clothing. In case of contact, immediately flush eyes or skin with water for 15 minutes.

GENERAL INFORMATION

NutriBoost High Iron can be used for economical correction of zinc, manganese, copper, deficiency of vegetables, row crops, small grains, deciduous trees and vines, citrus, and turf. **NutriBoost High Iron** is specially designed for both soil applications and foliar applications. **COMPATIBILITY: NutriBoost High Iron** is compatible with most pesticides and fertilizers. However, if the desired combination has not been previously used, a compatibility test is recommended.

DIRECTIONS FOR USE

This product is recommended to correct specific micronutrient deficiencies. This product should be used on the basis of a soil and / or tissue analysis. For fertilizer application rates suitable for your geographical area or the maximum allowable application rate per acre, consult a certified crop adviser or a trained agronomist. For specific crop recommendations in your area, consult your state's recommendations.

NutriBoost High Iron is designed to be more effective when used with polyphosphates and nitrogen solutions as a soil application for all crops requiring zinc, manganese, copper, and magnesium.

Row or band application: apply 1 - 2 quarts per acre just before or at planting time.

Broadcast application: apply 2 - 5 quarts per acre just before planting and work into the top 3 - 5 inches of soil.

Foliar application: for foliar application this product may be used at the rate of 1 - 2 pints per acre with a sufficient amount of water to ensure good coverage. Do not exceed 1 quart per gallon of water. Optimum rate of application will vary between fields depending on soil pH and organic matter content. For best results follow soil test or plant analysis recommendations. To ensure even distribution on the leaf surfaces and increase the effectiveness of foliar application, a small amount of

wetting agent or surfactant may be added. Spray to thoroughly cover foliage. Rates and timing of applications are dependent on local conditions and practices.

Apply 4-6 weeks after planting.

Note: Foliar spray of **NutriBoost High Iron** should not be considered as a substitute for soil application, but rather a supplement or temporary measure to correct zinc, copper manganese, iron, and magnesium deficiencies in most crops. A number of variables influence the rate of application necessary to control or correct a specific deficiency. For best results, follow a good agronomic practice.

Liquid Fertilizer:

Mix **NutriBoost High Iron** with liquid fertilizer agitating to thoroughly disperse the trace elements. This can be achieved by adding the product to the mixing batch tank or inducting through a pump. When mixing in batch tank, add to water nitrogen solution before adding phosphate material. Ag Elements, LLC also manufactures a complete line of chelates for a high-analysis fertilizer.

NutriBoost High Iron is compatible with most insecticides, fungicides, foliar nutrients and herbicides. It can be applied in existing spray programs. Use 1 quart per acre in banded application and 2 quarts per acre in broadcast application. An ammonium sulfate source is recommended when tank mixing with glyphosate and some other herbicides.

CONDITIONS OF SALE: 1. Seller warrants that this product consists of the ingredients specified and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. No one, other than an officer of Seller, is authorized to make any warranty, guarantee of direction concerning this product. 2. Because of time, place, rate of application and other conditions of use are beyond seller's control, seller's liability from handling, storage, and use of this product is limited to replacement of product or refund of purchase price.
