Double K 4-8-12

Double K 4-8-12 is a clear, water white non chloride Nitrogen, Phosphorus and potassium source. It can be applied with other Ag Elements NPK 9-24-3 and 9-18-9 as well as EDTA chelated micro nutrients such as Nutriboost. Double K 4-8-12 has flexible application methods in most any crop.

Directions For Use

- Double K 4-8-12 can be applied as a foliar spray.
- Double K 4-8-12 can be tank mixed with many pesticides.
- Double K 4-8-12 can be applied through seed planters, both in furrow with the seed and banded over the seed row.
- Double K 4-8-12 can be strip tilled prior to planting.
- Double K 4-8-12 can be applied as a side dress application in soil or through various irrigation systems.
- Double K 4-8-12 can be used for part or all of a crops annual potassium needs.
- Rates will vary by the demand each crop has for potassium.

Technical Data

Weight Per Gallon@ 68° F	10.28 lbs/ gal
Specific Gravity	1.078
pH@ 68° F	7.2
Freezing Point	40° F

Guaranteed Analysis:

Total Nitrogen	4.00%
4.00% Urea Nitrogen	
Available Phosphate (P2O5).....	8.00%
Soluble Potash (K2O)	12.00%

Derived from: Potassium Phosphate, Urea, and Ortho Phosphoric Acid
