

# INFERNO

## Active Ingredients:

<b>Carboxylic and Phosphoric Acids, Monocarbamide Dihydrogen Sulfate, Dimethylpolysiloxane, and Surfactants</b>	<b>90%</b>
<b>Constituents ineffective as an adjuvant</b>	<b>10%</b>

**Ingredients are exempt from tolerances under 40 CFR 180**

**CAUTION: KEEP OUT OF REACH OF CHILDREN**

**WARNING: MAY BE HARMFUL IF SWALLOWED.**

**Avoid contact with skin, eyes, and clothing. In case of contact,  
immediately flush eyes or skin with water for 15 minutes.**

## GENERAL INFORMATION

**INFERNO** is a specialized formulation of surfactants, activators, and water conditioners designed to enhance the performance of many herbicides. **INFERNO** is designed primarily to be applied with herbicides which utilize glyphosate as the active ingredient. **INFERNO** is also suitable and effective for most pesticides and nutritional products which can be used with surfactant/water conditioner type adjuvants. **INFERNO** can positively affect both pesticide spray application and pesticide efficacy. **INFERNO** can eliminate the antagonistic effects of hard water on herbicide efficacy.

- Do not mix **INFERNO** with herbicide products that contain DSMA or Sulfonyl-urea chemistry.
- Do not apply **INFERNO** to actively growing crops.

## DIRECTIONS FOR USE

FOR USE WITH HERBICIDES REGISTERED FOR: AGRICULTURAL, FORESTRY, INDUSTRIAL, MUNICIPAL, ORNAMENTAL, RIGHTS-OF-WAY, TURF, NONCROPLAND AND OTHER USES.

**INFERNO** may be applied by ground, or aerial spray equipment.

**Ground and Aerial:** Use 2-8 pints per 100 gallons of spray. For use with glyphosate or sulfosate type herbicides, use a minimum of 4 pints per 100 gallons.

**Water conditioning:** **INFERNO** should be used at 1-2 quarts per 100 gallons of spray solution when used in place of 8.5-17 pounds of ammonium sulfate. **Buffering:** to obtain an initial buffering effect, use a minimum of 3 pints per 100 gallons of spray. Rates may be adjusted as water conditions vary. The use of a pH measuring device is recommended to determine a suitable **INFERNO** rate. Do not add adjuvant at a level that would exceed 5% v/v of the finished spray volume.

## MIXING

1. Fill spray tank one-half full with water and begin agitation.
2. Add **INFERNO** first and continue agitation.
3. Add pesticides and/or fertilizers as directed by each product label or in the following sequence:
  - A. Micronutrients and fertilizers
  - B. Dry flowables and water dispersible granules
  - C. Flowables
  - D. Water soluble pesticides
  - E. Emulsifiable concentrates
4. Continue agitation and complete filling of the spray tank.
5. Do not mix **INFERNO** with undiluted pesticides.

CONDITIONS OF SALE: 1 Seller warrants that this product consists of the ingredients specified and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. No one, other than an officer of Seller, is authorized to make any warranty, guarantee or direction concerning this product. 2. Because of time, place, rate of application and other conditions of use are beyond seller's control, Seller's liability from handling, storage, and use of this product is limited to replacement of product or refund of purchase price.
