***YOUR EQUIPMENT IS AN INVESTMENT -
DOES IT PERFORM THAT WAY?***

TESTIMONIAL

“Gulf Wave came through again!!! We are a small hand shop with no overhead crane. We asked for Gulf Wave to design a tilt table . . . What we got was the most well-built tilt table I have seen or used. I have owned 2 other tilt tables and both were trash; they would wobble and not hold as pieces were being slid . . . death traps. I scrapped both of them as they were not suitable to be used or sold. This table is SOLID and easy to use. We now do all of our islands 30" or taller on the table. Why try to stand and flip these pieces? Now, if I have 2 guys in the shop, we can safely flip a 72x128 island over and do underside work on it. AS ALWAYS I ASK AND GULF WAVE DELIVERS!!! Your crew rocks. You have done wonders for our shop and we have grown because of you.

Thank you for taking interest in small guys like us, not everyone does. You have made our shop safer and easily change our fabrication department daily to fit each jobs' needs because of your tables. 13 years ago you would have never told me we would eventually have a shop of all mobile tables.”
