Dungeon Plunder is a turn based strategy game for 1 or 2 players.

The game has three modes:

Surprise - Avoid ghosts with no torch.

You've stumbled upon the dungeon and aren't prepared.

Explore - Avoid ghosts and monsters.

You've entered a dungeon with a single level.

Excavate - Travel deeper and deeper.

You've entered a never ending set of catacombs.

Plundering all the treasure on the level takes you to the next level of the dungeon.

The dungeon gets more difficult and dangerous as you go on.

The objective is to find treasure and carry it back to the entrance without running into ghosts or monsters.

At full health you can make 8 moves per turn.

After the player's turns the monsters and ghosts get their turns.

Monsters and ghosts get one move per turn but ghosts can move diagonally and go through walls.

Contact with a ghost or monster results in a battle that reduces the player's health and the moves the player can make on their turn.

After a battle the player returns to their door with their remaining health to continue plundering.

A player can withstand 3 battles before all health is gone and the game ends (for that player).

Ghosts and Monsters are asleep until awoken by a player getting too close.

Ghosts will return to sleep if the players move too far away.

Ghosts and Monsters wake when a player stops nearby, within roughly 3 moves.

Monsters will return to sleep if the players move too far away and they get tired.

Ghosts and Monsters are invisible while sleeping. Beware!

Objects found in the dungeon.

Door The player's dungeon entrance. The player is safe from monsters and ghosts at their door. Return treasures to the door to plunder them.

Walls Players and monsters must go around the walls. Ghosts can fly through the walls. A player's turn ends if they hit a wall.

Treasure Treasure is heavy! The player has fewer moves per turn when carrying treasure. All battles are fatal when treasure is carried.

Ghosts Ghosts always guard treasure. If their treasure is taken a Ghost will pursue the player until they catch the player or the player gets the treasure back to their door. A ghost dissipates when their treasure is plundered.

- Monsters** Monsters may guard a treasure. If their treasure is taken a Monster will pursue the player until the player moves far away (roughly 5 moves). Monsters never die.
- Torches** Torches show the walls immediately around the players. They use fuel with every turn and must be replenished by finding a new torch in the dungeon.
- Journals** Journals are maps left behind by earlier explorers and contain a map of the dungeon. When picked up all walls will be shown.
- Potions** Potions restore a player to full health when picked up.
- Shields** Shield protect players in battle. When carrying a shield the player will escape with their health intact. Shields are destroyed in battle. It isn't possible to carry a shield while carrying treasure. Picking up a treasure will drop the shield.

Controls

Dunegon plunder can be played using the keyboard or the controllers.

The controllers can be used for all game interactions except Quit Game and Switch Sound.

Strategy!

Patience is a virtue.

The player doesn't need to make all of their possible moves on their turn.

Anticipate how the Ghosts and Monsters will move and move accordingly.

Often the best move is no move.

Move carefully into unknown areas and retreat to safety before ending a turn's moves.

Pay close attention to where Ghosts and Monsters return to sleep so you don't move into them!

Two players can compete or work together to maximize their plundering.
