

Mission Statement

The mission of SCI Lighting is to provide our clients with lighting solutions that best fit their needs at their price point. SCI Lighting will communicate with utility providers, incentive program providers, lighting manufacturing companies, and lighting installers to ensure that our clients are getting the best possible value.

SCI Lighting

Providing energy efficient lighting solutions

Our Services

Lighting Upgrades

SCI Lighting provides recommendations and calculations for upgrading the current lighting in our client's facilities. We have the capability to perform the evaluation, make the recommendation after performing calculations, and install the recommendation.

Lighting Evaluations

SCI Lighting can provide our clients with lighting evaluations to determine their current lighting load and requirements. In most cases, these assessments are provided for free.

Lighting Solutions Strategy

SCI Lighting can provide lighting layouts for our clients including expected footcandle / lux measurements on the task plane. These layouts will take in to account the client's needs and wants as well as their future plans. SCI can use these layouts to display different solutions for client facilities.

Turnkey Solutions

SCI Lighting will handle the specifications, design, installation, and commissioning of the lighting systems including controls. Our turnkey solutions are tailored for each individual client.

Power and Money Savings

Let SCI Lighting show your company how we can improve your bottom line through efficient luminaires and controls.

Our Company

SCI Lighting's team has a combined 80 years of experience. We have assisted with lighting needs for private and commercial clients and government and military contracts.
