

This piece is done with multiple layers of thin side loads and floats. You will not need tons of each color. I will have extra paint available if needed and we always share between us, so don't fret if you do not have all the colors. In order to complete this project, some pre-class basecoating is necessary. Please refer to the prep photo-this is how you piece should look when you arrive. Persimmon is a discontinued color, if you do not have some bring a small container to mix paint in to class and you can basecoat the flower during the meeting.
