

# We recommend Full Access cabinets over Face Frame cabinets:

---

## 1. Increased Storage Space

- With no face frame blocking the cabinet opening, you get **full-width access** to drawers and shelves.
- Easier to store wide or bulky items, maximizing internal space.

## 2. Modern Aesthetic

- Clean, minimal lines with **flat door overlays** fit modern and European-style kitchens.
- No visible frame allows for **sleek and seamless designs**.

## 3. Better Drawer Access

- Drawers can be **wider and extend further**, making them more efficient for organizing tools, utensils, and kitchenware.

## 4. Easier Interior Access

- Full opening at the front makes it simpler to install and access **pull-outs, lazy Susans, or internal organizers**.

## 5. Faster Manufacturing

- Fewer parts to construct and align (no face frame means fewer cuts and joins), which can **reduce production time**.
