

# The Learning Lab Class Schedule

## Lego and Math Lab

Our Lego Lab is designed to focus on playful narrative-based problem-solving with relatable themes that can develop young students into independent STEAM thinkers. All lessons focus on national standards for both lower and upper elementary grades. During each lesson, students brainstorm and develop creative solutions through trial and error while collaborating with their peers. Class includes all materials, worksheets and legos! We also focus on grade- level math support, remediation and instruction.

Grade Level	Day of the week	Times
1-3rd	Tuesday	3:00-4:30

## Reading and Writing Lab

The reading and writing lab uses research based methods to strengthen reading fluency and comprehension. Our small classes are designed for optimal engagement and support for each student. Students will receive direct instruction on various types of writing, correction and revision and final composition.

## Math Lab

These courses will review and bolster the student's knowledge of the concepts being currently taught in their school class that are necessary for success and will roughly run parallel to and be supportive of the math class they are currently taking. Class time will be allocated toward answering the student's specific math questions and difficult homework problems. The student often finds this very helpful with their immediate needs. The instructors will help to strategically guide the student as to how to best prepare for their math exams. The students can even apply such strategies more generally to all of their school classes.
