

The most practical, affordable, life-like WaterLeg available!

When covered by insurance, you and your client benefit.

Finally, your clients have the freedom to get wet—any way they want—without ruining their primary prostheses! The WaterGait™ is the first of its kind—with breakthrough technology.

The WaterGait is designed for Trans-Tibial amputees to use in any warm water environment (above 45°). Its rugged PP shell is bonded to a laminated socket and covered with a custom color-matched skin finish. The WaterGait WaterLeg can be made with or without a shuttle lock; buoyancy neutral, for diving; or in a beachcomber style (as pictured below) for activities where buoyancy isn't an issue.

Call us today or check out our Web site for more details. Please have your clients contact us directly if a WaterLeg is not covered under their insurance.

(Have your clients mention PV91 to receive free water shoes with their WaterGait)

Get Back in the Water!
