

Applied Pressure – Liability Waiver and Release of Claims

Client Name: _____

Date of Service: _____

Vehicle Year / Make / Model: _____

1. Assumption of Risk

Client acknowledges that auto detailing involves various procedures using chemicals, equipment, moisture, and cleaning techniques that may interact differently with each vehicle's materials, condition, and manufacturing quality. Client voluntarily assumes all risks related to:

- Paint, clear coat, or trim condition
- Electronics and infotainment systems
- Upholstery and carpet wear
- Aftermarket or third-party modifications
- Vehicle component age, wear, or manufacturer defects

Applied Pressure makes no guarantee regarding the outcome of the service when risks are present or not disclosed.

2. Pre-Existing Damage

Client agrees that Applied Pressure is not liable for pre-existing conditions or damage, including but not limited to:

- Scratches, scuffs, paint chips, faded or oxidized clear coat
- Torn, worn, or fragile leather, vinyl, or fabric
- Electrical or mechanical issues unrelated to detailing
- Water leaks due to worn seals or prior damage
- Weak paint adhesion or previously repainted panels

Applied Pressure may document such conditions with photos before service. Failure to disclose known conditions waives any claims arising from related issues.

3. Non-Responsibility for Personal Items

Client agrees to remove all personal belongings from the vehicle prior to service. Applied Pressure is not responsible for:

- Lost or missing items
- Damage to sensitive belongings left inside the vehicle (e.g., sunglasses, electronics, paperwork)
- Delays in service due to removal of personal items

Applied Pressure reserves the right to avoid cleaning areas obstructed by client belongings.

4. Weather, Work Environment, and Mobile Limitations

Client understands that services performed outdoors or at a client-provided location may be affected by:

- Weather (rain, heat, humidity)
- Inadequate space, shade, or access to water/power
- Surface irregularities or environmental hazards

Applied Pressure may cancel, delay, or adjust services due to unsafe or impractical working conditions. This waiver covers any service delays caused by such environmental factors.

5. Chemical Use and Material Sensitivity

Applied Pressure uses high-quality, industry-standard products designed for automotive use. However:

- Certain materials may react unpredictably due to age, prior treatment, or manufacturer variation
- Leather, Alcantara, suede, and dyed or coated surfaces may discolor or degrade under standard cleaning
- Older plastics, trim, or rubber may fade or crack due to existing UV damage

Client releases Applied Pressure from liability related to product interaction with unknown or previously compromised materials.

6. Steam Cleaning and Moisture-Related Risks

Steam will not be used directly on screens or delicate electronics. However, interior detailing may involve:

- Controlled steam for sanitization
- Moisture exposure near vents, fabrics, or crevices
- Detailing near speaker grilles, buttons, or exposed wiring

Client understands and accepts all reasonable efforts will be made to protect these components, but Applied Pressure is not responsible for electrical failures, sensor alerts, or moisture-related issues following steam use.

7. Paint Correction and Enhancement Disclaimer

If paint correction or enhancement services are performed:

- Minor swirls and defects may be improved, but not all imperfections will be removed
- One-step polishing is not equivalent to full paint correction
- Paint depth varies; Applied Pressure will use safe techniques, but Client assumes the risk of polishing older or repainted surfaces

Client understands that detailing cannot reverse damage like rock chips, deep scratches, or clear coat failure.

8. Add-On and High-Risk Services

Services such as engine bay cleaning, trim restoration, and pet hair removal carry elevated risk:

- Engine bay cleaning is cosmetic only and may expose sensitive components
- Trim restoration may temporarily darken color or leave uneven tone if material is already damaged
- Pet hair removal may not restore carpet to original condition and may extend labor beyond estimate

Client agrees these services are performed at their request and releases Applied Pressure from responsibility for any adverse outcomes resulting from their application.

9. Post-Service Issues and Claims

- Client must report any concerns within 24 hours of service
- If a rework is approved, it must occur within 7 days
- Applied Pressure reserves the right to inspect any claimed issue before offering remedy

Refunds are not guaranteed and will not be issued for dissatisfaction based on unmet expectations or misunderstandings of service scope.

10. Right to Refuse Service

Applied Pressure reserves the right to:

- Decline service if a vehicle is excessively dirty, biohazardous, infested, or unsafe to enter
- Cancel or reschedule appointments without liability if unforeseen conditions prevent work
- Adjust pricing due to unexpected labor needs (client will be informed before continuing)

11. Photo & Marketing Use

Client authorizes Applied Pressure to take before and after photos of the vehicle for:

- Quality assurance
- Marketing and promotional use (website, social media, etc.)
- Liability documentation

Photos will not include identifiable information unless consent is given.

12. Entire Agreement

This document represents the entire understanding between Applied Pressure and the Client. By signing below, Client acknowledges they have read, understood, and agree to all terms and assume full responsibility for the vehicle's condition and results.
