

DIGITISE YOUR SUPPLY CHAIN

SquawkTrak4 is a cutting-edge range of tracking devices that deliver detailed, real-time location data for your assets—anytime, anywhere.

Designed for a variety of environments—including assembly lines, warehouses, and transit—SquawkTrak4 continuously streams journey data directly to your dashboard, ensuring complete visibility throughout every stage of your supply chain.

On land, in the air, or at sea, SquawkTrak4 keeps you informed with seamless, real-time tracking of your assets. GPS tracking eliminates blind spots by extending visibility far beyond the limits of pre-existing technology offering truly global coverage.

All SquawkTrak4 devices are equipped with smart alerts, instantly notifying you via email or SMS if an asset leaves a designated location.

Whether you're managing a simple logistics chain or a complex, multi-stage operation, SquawkTrak4 empowers you with the insights to stay ahead—enabling accurate delivery forecasting and complete operational confidence.

SquawkTrak4.

Tracks Anything, Anytime, Anywhere.

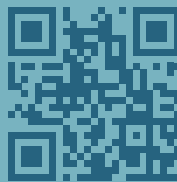

TRACK ANYTHING, ANYTIME, ANYWHERE!

Whether you're tracking vehicles, equipment, trailers, or high-value assets, SquawkTrak4 GPS trackers deliver dependable, real-time location data with minimal setup and long battery life.

Choose from USB-rechargeable, hardwired, or solar-powered models to suit any application—each built to withstand harsh environments and backed by user-friendly web and mobile access. With flexible reporting, no contracts, and industry-leading durability, SquawkTrak4 keeps your assets visible, secure, and within reach—anytime, anywhere.

TRACK ANYTHING, ANYTIME, ANYWHERE!

The SquawkTrak4 web portal puts you in command of your assets with live GPS tracking, smart alerts, and detailed reporting—all in one easy-to-use platform.

Track in real time with an interactive map, set custom geofences and alerts, and access rich historical data to optimize routes and improve performance. With multi-user access, a customisable dashboard, and enterprise-grade security, the portal scales with your business—whether you're managing a few assets or a global fleet.

GPS TRACKERS

SquawkTrak4 can be used as stand-alone or as a hub for multiple beacons.

SquawkTrak4 – Battery Powered

Ideal for tracking assets without the need of a constant power source. Easily rechargeable via USB, this device offers quick deployment and is perfectly suited for assets in all forms of transit.

SquawkTrak4 – 12V Powered

Designed for permanent installations with a 12V power source. Offers continuous operation with backup capability.

SquawkTrak4 – Solar Powered

Optimal for long-term outdoor asset tracking where exposure to sunlight is consistent. A minimum of maintenance is required after setup.

BEACONS

Tracking for high value assets from assembly to delivery.

A reliable solution for discreet tracking. These beacons seamlessly detect and monitor assets throughout their journey through secure communication with the SquawkTrak4 device.
