

**ToothSavers** is part of the nation's largest mobile in-school dental program servicing more than 500,000 children annually. Our mission is to improve oral health for children who may not regularly see a dentist while simultaneously making it easy and convenient for parents.

## About our program:

### **ELIGIBILITY**

- There is no charge to the district or schools.
- Most dental insurances, including Medicaid, cover 100 percent of the services that are provided.
- Serving students ages 18 months–18 years.

### **SERVICES**

- Our teams are made up of caring, local dental professionals and staff members.
- We provide oral health screenings, sealants, fluoride, and silver diamine fluoride (SDF).

### **COMPLIANT**

- We are OSHA and HIPAA compliant.
- We adhere to the CDC Guidelines for Infection Control and to Practical Infection Control for Dental Sealant Programs in a Portable Dental Care Environment.

### **PROCESS**

- We complete all necessary paperwork for state-mandated required dental exams.
- We provide permission forms for every child.
- Each child receives an oral health report card to take home after the dental visit.
- A copy of the oral health report card is left with the school for each student's file.
- Our patient Care Coordinators contact parents of students needing additional follow-up by either mail or phone.

### **All we ask of you before the visit:**

1. Distribute the permission forms to the children and/or parents and return the completed permission forms to us in the postage-paid envelopes provided.
2. Identify a space (approximately 15'x15') where the team can set up the "dental office."
3. Partner with us in making sure your parents know the dental team is coming to school.

**Our organization has been happily bringing healthy smiles to children, families and communities for more than 25 years!**
