

KEYSTONE FIBER, LLC.

A Fiber Optic Splicing Company

Keystone Fiber, LLC. is a fiber optic cable contracting company that utilizes work ethic and drive to provide our clients with an organization geared towards, not just success, but excellence.

Who we are...

Based out of a small town in Pennsylvania, we have built our team up from just one person, in 2019, to a family of 34 talented people that share a great work ethic and determination to provide the best possible services to our clients. Additionally, we have expanded our teams in our local markets, as well, by reaching out to local colleges and National Guard units to supplement our staff and are extremely proud to have 9 members of Iowa National Guard C Company, 1st Battalion, 168th Infantry Regiment working with us, along with our full-time crews.

What we do...

We provide various responsibilities including OSP production, FTTH, fiber placement and pulling, fiber testing & of course, quality control.

Our goal is to meet deadlines and ensure quality work together with, most importantly, exceeding expectations.
