# ZAMORI SHOWER TRAYS

## QUALITY SPECIFICATIONS

- **Anti-Slip** - The Zamori anti-slip option features the highest possible anti-slip rating. The anti-slip surface is embedded into the tray material during the manufacturing process. This gives a high quality look and feel compared to most other anti-slip trays, where the anti-slip surface is applied after production.
- **Antibacterial** - All Zamori trays are impregnated with a bacteria and mould lighting "zemic" agent. The antibacterial property of Zamori trays means increased hygiene and easier cleaning.
- **Patent Re-inforcement** - Zamori trays are acrylic, capped and feature a patented steel reinforcement frame within the tray. This ensures strength, rigidity and a lifetime of use.

## CLOSE COUPLED SENSOR FLUSH KITS

With a simple wave of the hand, hygienic, contactless flushing is now here for close coupled WCs. Two sizes are available depending on the size of the flush button hole in the cistern lid. The button kits have been designed to retro-fit to existing WCs which have paddle operated flush valves. For cisterns which have pneumatic or cable operated flush valves, or where the button screws in directly to the flush valve, then the flush valve then also need to be swapped to our 19R303 valve which has a 2" base.
