*"I have worked with Tracer Foster and with RHC for the past several years. I have found Tracer to be extremely responsive to the complex needs of my residents needing home health care and am impressed with his follow-up. He always informs me of how the patients are doing at home following discharge. RHC offers professional and empathetic services to the patients and their families to insure their needs are being met in the home setting. I also find their personal emergency response system to be state of the art and one of the best in the industry, and best of all there is no charge to the patients or their families for this additional service while RHC is in their home."*

*"As a nursing home administrator, my residents come before anything. The care and services they receive must be impeccable. Upon discharge home from skilled rehab, I expect the same level of care and services at home for my residents. This is why I refer residents and their families to Tracer Foster at RHC. Tracer comes to the facility, and meets with the resident and family at their convenience. Tracer provides a detailed explanation of care and services the resident is entitled to and the services they will receive. Tracer makes certain the resident and family fully understands and gives them time to ask questions and, as I do, provides his cell phone number to the client, and I can attest that Tracer answers his phone 24-hrs-a-day. Tracer follows his clients and stays in contact with them to be certain the care and services exceed his standards, RHC's standards, and exceeds the client's expectations. I am proud to recommend Tracer Foster and RHC for all your at-home needs."*
