

Gloeckner

Cut Flower Plug Program 2021

Veronica 'Skyler'

Fred C. Gloeckner & Co, Inc. has been the Broker of choice for cut flower growers since 1934. With our main office in Harrison, New York, and 31 Field Reps across the country, Gloeckner is able to service growers across the United States.

We broker plugs for more than 16 plug producers from coast to coast. These growers produce bedding plants, perennials, annuals, potted plants, herbs and other assorted crops. A handful of these growers do a fantastic job growing varieties specifically for the cut flower industry. We have produced this consolidated list of our main cut flower plug producers to make ordering easier for you, the cut flower farmer.

When placing your order, here are a few key things to keep in mind:

- ❖ Shipping costs from the grower to your location is not included in the prices listed. Buying from a grower close to you can reduce shipping expense. Picking up your order direct from the grower saves on shipping, and eliminates any plant stress or damage caused by shipping.
- ❖ Each grower offers different size plug trays, and a different product selection.
- ❖ Each grower has a different order minimum. Be sure to review this info on the Cover Page for each grower. Place your orders accordingly so that you meet the minimum, and fill each box as indicated.
- ❖ You cannot combine items from different growers on the same order. Each grower requires a separate order.
- ❖ Each ship date requires a separate order.
- ❖ Include a Monday ship date with each order.
- ❖ On each Cover Page, the grower has a web site listed with more info on their program.
- ❖ Place your orders by early November, so the growers have time to grow the plugs for you, and you get the varieties and colors you need. A limited selection is available in the spring from each grower's "weekly availability" list to fill last minute needs.
- ❖ Place your order with your Gloeckner or Ednie Sales Field Representative. A listing of Sales Field Reps can be found at www.fredgloeckner.com/reps.html. You may also place plug orders online at www.fredgloeckner.com Click on the "Order Online" button at the top right of the home page. It may be easier to figure your order from the attached lists before ordering online.
- ❖ Payment is due when the plugs ship to you. Your credit card will be charged, or your Gloeckner House Account will be invoiced at the time of shipping.
- ❖ As with all plugs, once they grower has sown the seed, you have committed to buying those plugs. No cancellations after trays have been sown.
- ❖ Patented plants require payment of Royalty as indicated on the plug list. Patented plants may not be propagated by division or cuttings

We look forward to helping you, the cut flower grower, produce a wide assortment of unique, beautiful, and profitable cut flowers for your customers. Let us know how we can help you.

The Gloeckner Company is also a leading supplier of Cut Flower Seeds, Bulbs, Dahlias, Perennials, Peonies, Anemones, and Ranunculus. And we have Grower Supplies too! Ask for more information on any of these programs.

With Kind Regards,

You're Gloeckner – Ednie Team

EASY STEPS TO PLACE YOUR ORDER ON STOREFRONT

A little prep goes a long way!

Before placing your plug orders with Fred C. Gloeckner & Company, be sure you can answer these important questions.

1. Have you organized your orders by grower, shopping list and ship date? Grower names and shopping lists are noted in the header on each page of this program.
2. Have you checked online availability if you are ordering within 12 weeks of your desired ship date? Availability links are noted on each grower's cover page in this program.
3. Have you met the order minimum requirements noted on each grower cover page?

Now you are ready to place your order online.

1. Go to: www.fredgloeckner.com

2. Click on:
(If you do not already have an account, click "request an online account", and then follow these steps.)
3. Select "Plant" to place an order.
4. Select "Shop" from the task bar.
5. Select the grower that you are ordering from.
6. Select shopping list. – It should match the heading of the program pages you have pre-planned to order from. Orders are placed one grower shopping list at a time.
7. Enter quantities, then hit "Enter". The quantity is the number of plugs/plants, not the number of trays. If you enter a quantity that is not a multiple of the plug quantity, it will round up to the next full tray quantity. With a 125 tray, 100 becomes 125, 300 becomes 375, etc. Check the number that fills the box after you hit "Enter".
8. Refresh your cart to Click on Add to Cart.
9. At Checkout, please select a Shipping Method. The most common method is 27 Fed Ex.
10. Submit order- Congratulations, you are done!!

Where do we go from here?

- Orders placed in advance will be grown for you. Please order early enough to allow growing time.
- Keep in mind all orders are subject to availability. If an item you ordered is not available, we will contact you.
- Remember, items are usually not ready for immediate shipping.
- Please contact us with any questions.

Berry Precision Seeder

Grow Your Own Plugs!

Ideal for small to midsize operations, the Berry

Seeder featuring the patented seed channel is one of the most accurate seeders on the market today. What's more, the flexible usage of the Berry Seeder extends to watermelon, raw petunias, cell packs, and more.

- Seed up to 250 trays per hour with unequaled accuracy
- Seeds the whole plug tray at once, not one row at a time
- Made of lightweight polycarbonate and machined aluminum
- Transparent seeder body allows for easy inspection of clogged holes and/or misses
- No motors, solenoids, bearings, or electrical components to break down

Please contact us for pricing/seed chart information.

GreenPower LED Toplighting

LEDs are Great for Propagation and Your Growing Area!

LED Toplighting produces significantly less heat, especially less radiation heat, than conventional HPS lamps, so you can control your

greenhouse climate more precisely and grow better crops faster, year-round. Less heat gives you more flexibility to use light more effectively; for example, by increasing light levels, extending lighting periods, or by using light on warmer days without having to ventilate. Less heat also means you can place the light source closer to your plants to reduce light loss even in low-ceiling greenhouses.

- **Improves Production:** Shortens growth cycles; Improves color, shape, and taste; Grow with more control over your climate; Grow year-round in low greenhouses
- **Cut Operational Costs:** Saves up to 42% on energy costs compared to HPS top-lighting; Reduces cost of power infrastructure to obtain your light level; Avoid costly remodeling with easy plug and play installation; Lower maintenance costs
- **Long-Life:** Emit at least 90% of their output after 25,000 hours and can last 5 times longer than conventional HPS light sources
