

FEATURED PRODUCT

Edition: August 2025

- **Extractable Nuclear Antigens (ENA)** are over 100 different soluble cytoplasmic and nuclear antigens. They are known as extractable because they can be removed from cell nuclei using saline.
- The Immunoblotting kit for the **Anti-Extractable Nuclear Antigen (ENA) Antibody Profile** is designed to qualitatively detect antibodies against extractable nuclear antigens in human serum. It serves as an aid in the clinical diagnosis of autoimmune diseases such as various rheumatic diseases, SLE, RA, systemic sclerosis and myositis.

✓ Reliable Results ✓ Easy visually interpretation ✓ No Cross-Reaction
