FEATURED PRODUCT

Edition: November 2026

AB-PINACA (ABP) is a potent synthetic cannabinoid agonist that binds to CB1 and CB2 receptors to produce psychoactive effects. As a frequently encountered illicit synthetic cannabinoid, it is a key analyte for forensic drug screening.

The **AB-PINACA (ABP) Test** is a one-step competitive-binding chromatographic immunoassay for qualitative presumptive screening of AB-PINACA with a cut-off value of 10 ng/mL. Designed for multi-matrix field screening, it handles solid powders/tablets, surface residues, urine and suspicious liquid samples without lab instruments.

PRODUCT ADVANTAGES

- **High accuracy**
- **Fast and reliable results in 5 minutes**
- **User-friendly operation**
- **Easy visual interpretation**

PRODUCT INFORMATION

AB-PINACA (ABP) Test
Cat. No.: X04-ABP
Specimen: Surface
Format: Dip card
Test Size: 25 T
Cut-off: 10 ng/mL

AB-PINACA (ABP) Test
Cat. No.: X02-ABP
Specimen: Surface
Format: Device
Test Size: 25 T
Cut-off: 10 ng/mL
