

## Going green

Zone Mechanical is very excited to offer our customers the latest in green technologies. There are a lot of new products on the market in the HVAC field that not only are designed to save the customer money in operating expenses, but also help the environment by reducing their carbon foot print. Whether you are looking to replace existing equipment or upgrade existing equipment to run more efficiently, Zone Mechanical can provide you with a detailed report showing you the payback over time along with the reduction in CO2 gases. We will also make sure you are aware of all the incentives you are entitled to for making the changes.

## Safety

Like most companies, Zone Mechanical knows how important safety is in the work place. All of Zone Mechanical employees have their 10 hour OSHA card and have participated in Zone's safety program. Zone Mechanical is proud of their .93 MOD rating, that is 7% better than the national average.

Zone Mechanical looks forward to the opportunity to assist you in any of your HVAC needs. We are confident that we can provide you with the attention you need in any project you might have.
