

Sewer Cleaning Notification

CIT Sewer Solutions will be cleaning sanitary sewers east of Blackhawk Street and Park Street from December 1, 2022 and December 15, 2022. Work will begin after 7:30 AM and should be completed by 7:00 PM.

Sewer lines can develop air pressure or a partial vacuum from the cleaning process. Usually any excess air pressure or vacuum will dissipate through your plumbing vents, but occasionally there are homes with inadequate plumbing vents (no vents, undersized vents, or obstructed vents)

In case of inadequate venting, air pressure could escape through your toilet, floor drain, sink, tub or shower drains causing water to splash out or a vacuum could draw the water out of your fixture traps causing an unpleasant odor.

To guard against this possibility please:

1. Cover all floor drains with plastic and place a weight on the plastic.
2. Cover all toilets with plastic & close the lid on the plastic.
3. If you should experience an unpleasant odor, run water into each drain to refill the traps.

Water and drains may be used as normal.

The cleaning of sanitary sewers is necessary to help prevent stoppages.

Thank you for your cooperation.
