

Eliminate Uncertainty and Unleash Opportunity

Technology is crucial to business success, driving sales, operations, financials, and customer relationships. It can foster rapid growth or lead to devastating setbacks through data breaches or functionality failures. Mitigating risks and seizing opportunities are essential for optimal business performance.

Our team brings two decades of expertise in managing, assessing, optimizing, and integrating technology infrastructure and development. We offer pre-investment tech due diligence and valuations, aiding your private capital decisions by identifying genuine opportunities and risks. Additionally, we review portfolio companies to uncover vulnerabilities, enhance integrations, and enable scale and profitability. Having conducted M&A reviews on every continent, we are equipped to support your investments globally, ensuring a positive return.

Operational Risk

One missed backup, compromised system, design issue, or licensing error can impact your portfolio. Initial and on-going diligence are required to maintain the soundness of operations. We care for the lifecycle of your technology, from due diligence through integration, management, and divestiture, with focus on:

Revenue: Systems and applications that are not built to innovate, scale and grow

Expense: Unsustainable capital, support, cloud, and resource costs and technical debt

Business Continuity: Poor operational diversity and inability to recover from a failure or cyberattack

Exposure: Licensing and contract compliance risk, supply chain vulnerability, and related legal and cost exposure

Security Vulnerability

The global business news is, and will continue to be, awash with headlines of companies brought to their knees by security vulnerabilities. The AltDigital team of battle-tested cybersecurity veterans will assess your digital and business estate to ensure investments are secure from accidental and malicious threats. We hold each of your operating companies to the highest standards required, creating best practices, ensuring compliance, and reducing uncertainty across your portfolio. AltDigital equips you with the tools for informed investment decisions.

Optimize Outcomes

You invest for the upside. Our seasoned technologists and innovators excel in identifying and capitalizing on that potential. We automate costly, error-prone manual processes, streamline technology operations, enhance system capabilities, accelerate development, and optimize expenditures to enable efficient scaling, competitive time-to-market, and consistent outcomes. Our strategies uncover new revenue streams and expand your market base. With a proven track record of implementing cost savings and revenue generation programs worth hundreds of millions of dollars, we ensure substantial value creation.

Where Are Your Opportunities?

| | |
|----------------------|--------------------------|
| Sales and Marketing | Procurement |
| App Development | Manufacturing/Processing |
| On-Prem & Cloud | Scheduling |
| Industry Compliance | Customer Experience |
| Vendor Management | Inventory Management |
| Human Resources | Logistics & Shipping |
| Reporting & Analysis | Patient Records |

AltDigital reduces investment uncertainty in modern tech-oriented companies. In today's landscape, every successful company is, to some extent, a tech-oriented company. AltDigital enhances your investment outcomes by empowering you to make more confident decisions, safeguarding your top line and profitability. Whether you're investing, enhancing the performance of a current company, or creating a new one, incorporating a comprehensive tech review into your strategy is crucial. AltDigital is here to ensure your success. Reach out today.

We are a technology services partner to IT and business executives across all industry verticals. We provide the creative spark and knowledge to help businesses achieve audacious goals. Our clients trust us to advance their technology enablement, secure their assets against cyberattacks, automate costly processes, and optimize returns on investments.

Speed to Goal

Urgency and direct talk to expedite expansion and revenue gains.

Relentless Innovation

Goal-driven technology and security project plans to transform tech liabilities into business advantages

Sophisticated Cyber Protection

Security transformations engineered by experts who have defeated insidious nation-state threat actors

Full-Spectrum Tech Knowledge

Demonstrated expertise in every realm of IT and cybersecurity.
