She found gourds to be the one medium that would allow her to use many of the techniques she'd learned over the years with an endless verity of sizes and shapes to work with.. She still competes in several gourd shows each year as well as wood carving shows where she enters her gourd art. She's then started teaching classes in 2003 at Midwest gourd shows and out of her home. Her work has been published in Beyond Basics (advanced gourd art) by Sterling Publishing and Creative Embellishments for Gourd Art by Marianne Barnes.

## **Iner Joelson (Iowa)**

I started carving in 2007 by stopping at a Carving Shop to look around. Before I left, I ended up buying a book on relief carving and two gouges. I went home and started butchering wood in the basement. Taking my first class on Wood Spirits with Loren Woodard, I was hooked. Since then I have taken numerous workshop classes covering a variety of styles from some amazingly talented artist. If I were to describe my style of carving, I would say it is fun. I enjoy the jewelizing of the flat plane Scandinavian style and look of gouge work. In truth I am not sure what my style of carving would be called but fun and evolving.
