

PACK-S2™ by Cristini

The design & the NEW S2 seam targeted to packaging grades

Constant void volume

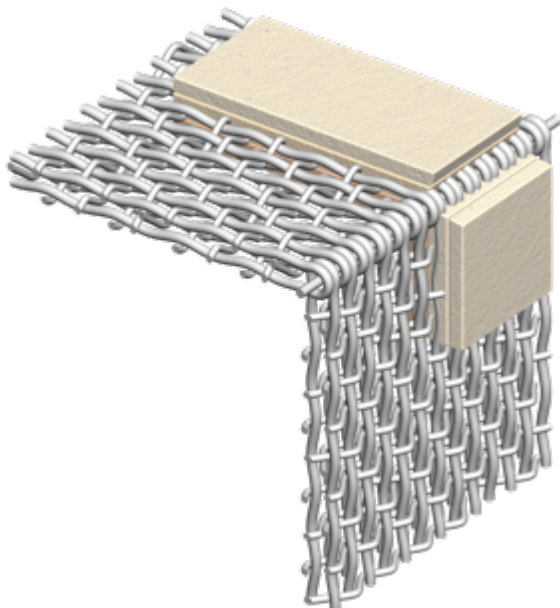

S2™ new seam body

Collapse resistance

Strong crimp

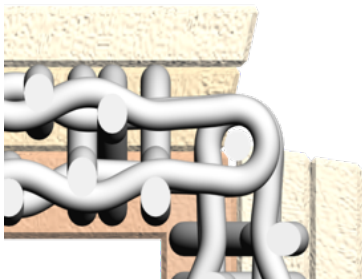

CRISTINI
RELIABLE INNOVATION™

PACK-S2™

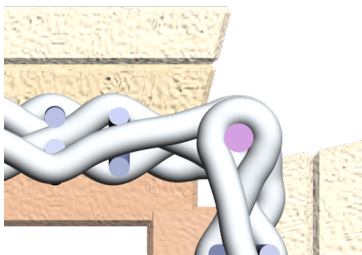

New S2 seam Design

S2™ is a complete new seam body with a new “U” tunnel to improve the resistance of the seam under the press also to improve the resistance to flap wear.

New loop design

Old loop design

Two Layer Evolution

The new Technology that allows better resistance to compaction of the base. This concept of base can be added to the different design seam or not seam of CRISTINI felts

Design

PACK-S2™ is a new development felt made by the R&D department for packaging grades on different machines speed. To improve collapse resistance and runnability on web on press section and transport applications on all types of machines producing packaging grades.

Double layer base design range:

Weight range	380 - 650 gsm
MD yarn	0,30 - 0,45 mm
<i>Loops better locked. No loops movement</i>
