

ConcreteDirect Release notes

Version 1.78 Expected January 13, 2021

New Features

All Apps:

- “Extra Charges” are now listed separately throughout the applications. Notably on the export and within e-tickets.

Customer App:

- In the order chats, Broadcast messages will now be colored black to prevent confusion between Dispatcher messages and Broadcast messages.
- Users can export orders up to a year old in two-month groupings. [iOS only, Android in future releases]

Driver App:

- The term “Out of service” has been added to the DVIR summary screen to emphasize that trucks with “Major” defects should not be used.

Dispatcher App:

- Company and Product tables are available for use on the User administration screen.
- Custom Jobsite Fields are now visible in the Order screen.
- [Bug fix] Driver Messages will no longer show as “Expired” .
