ConcreteDirect Release notes

Version 1.79 Expected February 3, 2021
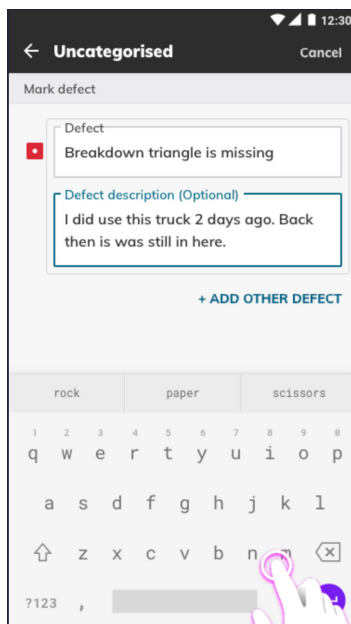

New Features

Customer Mobile App:

- Android and iOS users can export orders up to a year old in two-month groupings.
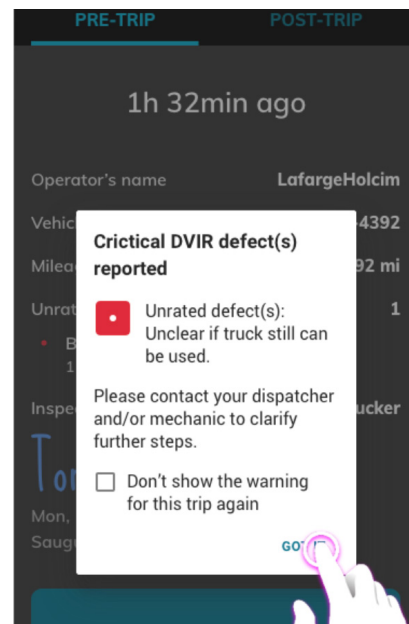

ConcreteDirect.com:

- When creating order requests, users can now search for mixes and additives by product code.

Driver App:

- The Driver Vehicle Inspection Report (DVIR) now allows drivers to create categorized and uncategorized "Other" defects. These "Other" defects are "Unrated" (neither major, nor minor) and will trigger the warning dialog to alert drivers of potentially hazardous defects.

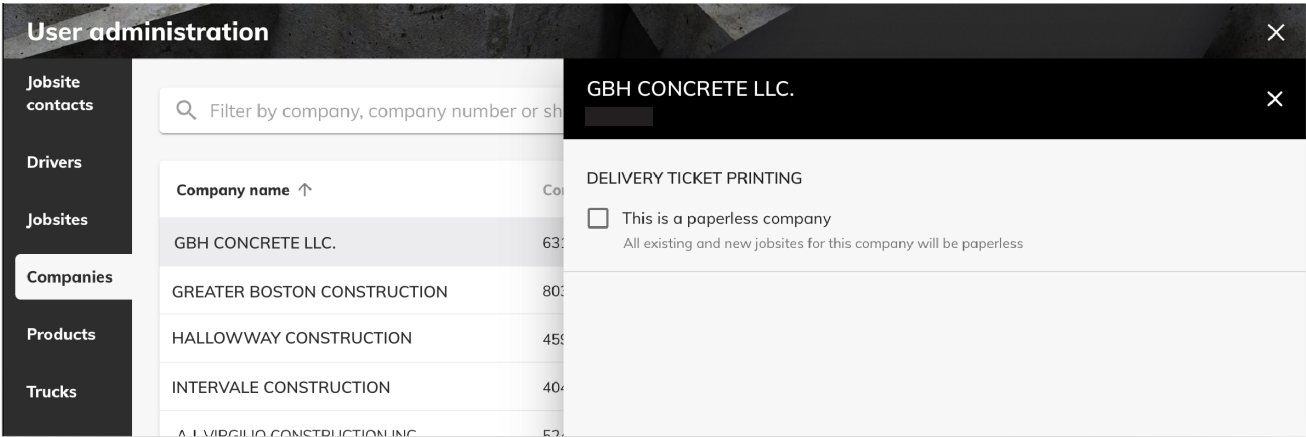

Creating an "Other" defect in the DVIR.

The "Unrated" DVIR dialog.

ConcreteDirect

Dispatcher App:

- A new administration screen listing all Trucks in the region has been added.
- The paperless flag can now be set on both the Companies and the Jobsites administration screens.

The paperless flag can be set on the company level from the "Companies" admin table or on the jobsite level from the "Jobsites" table.
