

ConcreteDirect Release notes

Version 1.81 Expected March 1, 2021

New Features

Customer Mobile App:

- **Quicker PDF Tickets:** Users will be able to open a PDF of the tickets using their phone's native PDF viewer. From there they can send, save, download etc. The goal is to make it as quick as possible to open the PDF.
- **Swiping tickets:** Customers can now swipe left and right between tickets of an order.

Driver App:

- **DVIR Improvement:** "Province/State" has been added to the DVIR details and Google Sheet.
- **DVIR Improvement:** The DVIR defect list will be easier to navigate now that the category and the defects will be displayed on the same screen.

The screenshot shows the 'Pre-trip: Checklist' app interface. On the left, there is a list of categories under headings A, C, D, and E. The 'Air brake system' category under heading A is highlighted in blue. On the right, there is a list of defects under the heading 'Mark defect'. Each defect has a checkbox next to it. At the bottom right, there is a blue button labeled 'SUMMARY'.

Category	Defect
A	
Air brake system	<input type="checkbox"/> Audible air leak
	<input type="checkbox"/> Slow air pressure build-up (more than 2 minutes)
	<input type="checkbox"/> Pushrod stroke of any brake exceeds adjustment limit
C	<input type="checkbox"/> Air loss rate exceeds prescribed limit
Cab	<input type="checkbox"/> Inoperative towing vehicle (tractor) protection system
Cargo securement	<input type="checkbox"/> Low air pressure warning fails or system is activated
Cargo securement	<input type="checkbox"/> Inoperative service, parking or emergency brake
Coupling Devices	
D	
Dangerous Goods	
Driver Controls	
Driver Seat	
E	

A side-by-side layout of categories and defects will make the DVIR easier for drivers to navigate.
