

Paperless Sharing of Tickets & Batch Records

To share the tickets of an order with any person's smart phone via driver tablet, tap the ConcreteDirect QR Code icon  to produce the scannable QR Code.

When sharing with the ConcreteDirect QR Code, have the recipient of the ticket open up their phone (or QR Reading app if they are on an Android with Android 7 or below) and point it at your device's QR Code Screen. A link will appear that can be tapped and will open up a PDF document of all the tickets associated with that order.

To have customer share any ticket and all of its data, tap the  in iPhones or the  in Android phones. This can be done via QR code or any other standard sharing method – email, text, etc.
