

ConcreteDirect

FLRA Next Step Concept

New Features

Dispatch App:

- Column added to “Schedule” table on order detail screen.
- Automated chat messages sent to Order chat when
 - New hazards are identified
 - Existing hazards are resolved

Customer App:

- Automated chat messages sent to Order chat
 - New hazards are identified
 - Existing hazards are resolved

Schedule table

The screenshot displays the ConcreteDirect app interface. At the top, there's a navigation bar with tabs: Orders, Customer chats, Requested orders, and Activity. The user is logged in as 'Susan from Kubik | NER | Logout | 1.59.0.dev - 04/21/2020 | EN FR ES'. Below the navigation bar, there's a 'Back to all orders' button. The main content area is divided into three sections:

- Schedule Table:** A table with columns: CY, Load, Truck, Mix, Plant, Departure time, and FLRA Reviewed (0/0). The table contains 9 rows of data.
- Map:** A map showing the location of the orders, with a red pin indicating the current location.
- Chat Window:** A chat window on the right side of the screen, showing messages from the customer and the dispatcher.

Schedule Table Data:

CY	Load	Truck	Mix	Plant	Departure time	FLRA Reviewed (0/0)
1	1/13	1706	404307.	Waltham	07:59	⚠️
1	2/13		404307.			OK
1	3/13		404307.			OK
100	4/13		404307.		02:45	*
0	5/13		404307.			*
1	6/13		404307.			⚠️
1	7/13		404307.			*
1	8/13		404307.			⚠️
1	9/13		404307.		02:49	⚠️
