

ConcreteDirect

Version 1.68 Expected August 12, 2020

New Features

Dispatch App:

- When using the "Ticket export" feature, the XLSX spreadsheet will include an additional sheet that contains the FLRA answers entered by drivers for each of the tickets.

Customer App:

- When placing orders, the default time in the field will be 12am to eliminate the accidental placing of orders at 7am which goes unnoticed.
- When drivers indicate a hazard on their FLRA, a push notification will be sent within the order chat channel.

Driver App:

- FLRA dialogs now include a Covid warning to remind drivers of the continuing risk.
- The address search field has been merged with the direction card to improve the visibility of the map when planning navigation.

3:48

This is a paperless ticket. You won't receive any printouts during the delivery.

Field level risk assessment (FLRA)

Check the following before unloading

Safety regulation	Yes	No
Flagman present to back-up truck?	<input checked="" type="radio"/>	<input type="radio"/>
Ground level, compacted and clear?	<input checked="" type="radio"/>	<input type="radio"/>
Truck at least 1m from excavation?	<input checked="" type="radio"/>	<input type="radio"/>
Safe space around truck?	<input checked="" type="radio"/>	<input type="radio"/>
Is location free of overhead hazards?	<input checked="" type="radio"/>	<input type="radio"/>

STOP THE SPREAD: Face covering, hand washing, and social distancing all reduce the spread of Covid-19

NO RISK
