

In order to protect drivers and customers from the transmission of the Coronavirus (Covid-19), tickets no longer require signatures.

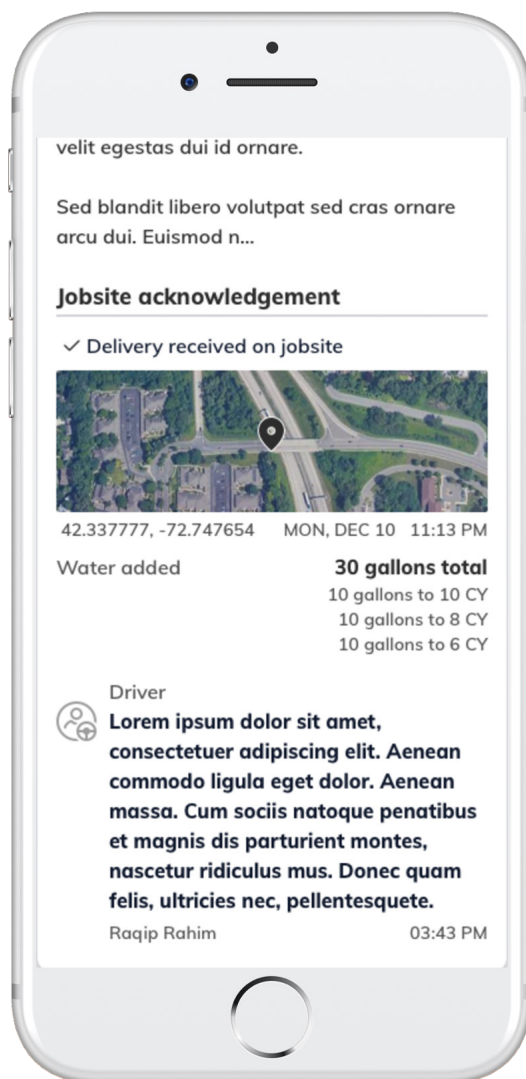

Updated March 30, 2020

The signature button has been replaced by a “Delivered” button. Drivers **MUST** tap this button...

...and confirm the following dialog *at the location of delivery.*

Drivers can mark a ticket as “Delivered” before or after recording water additions. There is no restriction on which must come first.

Customers will be able to see this location on each ticket.
